

STRATEGIC COLLABORATION

Clean, reliable data are the cornerstone of any successful trial. That's why inVentiv Health Clinical's global data management experts collaborate with your team to develop a strategy for managing your project's data, with stringent quality-control measures at every step. Our robust, flexible and scalable processes mean we efficiently capture, maintain, clean and deliver data for your project regardless of phase, therapeutic area, size, or data capture method.

INDUSTRY-LEADING EXPERIENCE

Our global data management team's broad exposure to diverse industry issues over many years, combined with flexibility in areas from small-scale individual projects to large-scale strategic partnerships, enables us to meet unique study needs.

inVentiv Health Clinical is a CCDM® Industry Partner, with expert staff averaging:

- **DM Project Leads:** 12 years of experience
- **Data Managers:** 9 years of experience
- **DM Programmers:** 10 years of experience

SYSTEM FLEXIBILITY. GLOBAL EFFICIENCY.

Efficient, software-independent processes allow us to flexibly deploy data management software based on your preference. We have extensive experience working in sponsor-hosted technologies and can follow inVentiv Health Clinical's or your standard operating procedures. Our eight data management centers in the US, Europe, and Asia Pacific follow the same standard operating procedures to ensure global consistency, optimal workflow, data quality and efficient processes. inVentiv Health Clinical's standard processes are based on the Good Clinical Data Management Processes (GCDMP) as defined by the Society of Clinical Data Management (SCDM) to ensure the highest quality and industry acceptance.

We have established partnerships with leading EDC technology vendors enabling us to provide you full-service design, build, and support activities. These partnerships ensure inVentiv Health Clinical has the latest technology releases and best practices for efficiently designing and supporting studies in their platforms. inVentiv Health Clinical also maintains active relationships with multiple electronic data vendors including ePRO and other mid-tier EDC vendors. These relationships ensure we can integrate efficiently and work with these systems.
