

# REDEFINING EARLY PHASE CLINICAL SERVICES

inVentiv Health is leveraging its unique patient recruitment solutions and therapeutically-aligned operations with the opening of a new Phase I/IIa Unit in Miami. The Miami clinic will build upon years of experience at inVentiv's Early Stage Development Group and complement its existing Phase I Unit in Quebec City.

The new clinic, which will focus on Phase I inpatient and translational medicine, will provide inVentiv's clients an option to run Phase I studies in the US and benefit from the associated regulatory advantages and positive recruitment dynamics of south Florida. In doing so, they will receive the same proven quality service and support inVentiv Health has exhibited for over 20 years. Clients will benefit from access to a broad demographic to facilitate patient access and help expedite progression to Proof of Concept.

With our innovative approach to clinical trial recruitment, two industry-leading bioanalytical laboratories, therapeutically-aligned leadership and global infrastructure, inVentiv provides the tools you need to become smarter earlier in the development process.
