

Asia and the Pacific Rim have become increasingly important for developing clinical products and conducting clinical trials and inVentiv Health Clinical has made significant investments in infrastructure and resources to support our clients in the region.

Our knowledgeable local experts have the right therapeutic, medical, and regulatory expertise; decades of experience; and a commitment to quality to help clients successfully develop their products throughout the region. We provide intelligent solutions beyond speed and cost savings.

THERAPEUTIC EXPERTISE

Our local teams, including medical doctors and PhDs, have conducted more than 250 local studies across more than a dozen therapeutic areas, including CNS, oncology, infectious disease, endocrinology and metabolic disease and genetic disorders.

CLINICAL CAPABILITIES

inVentiv Health Clinical's solid infrastructure provides our customers with complete development services across all phases of research, including: clinical operations, data management, biostatistics, rater training, medical writing, regulatory affairs, consulting, medical and scientific affairs, pharmacovigilance and IVRS/IWRS.

REGULATORY EXPERIENCE, QUALITY ASSURANCE

inVentiv Health Clinical has successfully completed more than 150 regulatory submissions resulting in approvals in the region during the last six years. And our commitment to quality spans the globe. Between 2009 and 2012, our local sites and offices were successfully audited by sponsors and regulatory agencies including the US FDA, EMA, Korea FDA, Taiwan FDA, and Singapore HSA.

BEYOND CLINICAL

As part of the inVentiv Health network of companies, inVentiv Health Clinical has the unique ability to offer our clients services to help them commercialize their products across Asia. The inVentiv Health team can integrate commercial insights early into the new product development process, prepare the market for a successful product launch, and optimize resources for the greatest commercial impact by combining sales solutions, multi-channel marketing and patient outcomes services with integrated communications. inVentiv Health has locations Japan (where they are the second largest commercial services firm with offices in Tokyo and Osaka), Korea and China.

LOCAL EXPERIENCE, GLOBAL REACH, COMPREHENSIVE SERVICES

inVentiv Health Clinical knows our clients need a partner with the depth of experience and expertise to provide efficiency, speed, and cost-effectiveness.

With therapeutically-aligned clinical development services and an integrated worldwide infrastructure designed to perform clinical trials ranging from large, complex global studies to smaller regional studies, our commitment to quality is unsurpassed. Let inVentiv Health Clinical work for you throughout the Asia Pacific region.
